

Sample Output Images:

Flash Effect: A camera-inspired flash effect built entirely with HTML and CSS, simulating a shutter burst to create a cinematic, interactive photography experience.

Main Page: Contains Full width image and hamburger icon which is click box working as sliding button.

Slide Menu: Clicked Action shows side menu. Hover Action creates glowy effect which is created using box shadow and color.

Social Media Icons: Hover Action shows glowy effect which is created using color and opacity property. And Cross icon changes size after hovering due to font-size property. Also cross symbol uses general sibling combinator property.
